15. Conclusion.

A Pocket Guide to Scientific Writing in Aquaculture Research

Rodrigue Yossa, WorldFish HQ

Writing a high-quality scientific aquaculture publication is challenging, and many students and early career aquaculture scientists find the task daunting. Yossa provides new researchers with all the tools they need to write abstracts and a variety of articles (peer-reviewed, technical, magazines, working papers, scientific reports and more). He talks the reader step-by-step through the process of reviewing submitted manuscripts and replying to reviewers, and understanding research ethics. Each section is accompanied by examples, offerings a lifeline to aquaculture students and early career academics getting to grips with the basics.
