

KULIMA Promoting Farming in Malawi: Improving the access to and use of agriculture research innovations by Malawian farmers

Project brief

May 2019 to October 2019

Project Summary

This project aims to contribute to the growth and expansion of commercial agriculture while also tackling the long-term aspects related to improved food and nutrition security. It intends to do so through:

- a) increase in agricultural productivity and diversification through mainly upscaling climate-smart agriculture technologies;
- b) agriculture value chain and business development;
- c) support to improved governance in the agriculture sector

Contribution to Outcomes

2 Outcome Impact Case Reports

- I. Promoting adoption of integrated agriculture and aquaculture production systems in Malawi ([Read more](#))
- II. An holistic approach in disseminating CGIAR technologies and innovations to boost the efficiency of agriculture production systems in Malawi ([Read More](#))
